FOREWORD

The fortnightly Soviet Bibliography is an attempt to list on a current basis the most significant published materials having to do with the Soviet Union, its foreign policy, economic and social development, and its impact upon the satellite countries and the world in general. It is compiled by the Division of Library and Reference Services and is based primarily on materials available in the central collection of the Department of State but also including publications in other libraries of the Washington area. Only materials in the English language are included and the periodical articles are selected from about 50 of the most pertinent and scholarly journals currently published.

Emphasis must be placed on the fact that the bibliography lists only a fraction of the pertinent materials in the Department's collection. Requests for supplementary and additional materials are always welcome.

The Division of Library and Reference Services is prepared to supply on loan, through its Circulation Section in accordance with Departmental security regulations, any of the items listed in the Bibliography. For this service authorized persons may apply to the Circulation Section, LR, Room 202, State Annex #1, or call Republic 5600, extension 3363.
